While it might not be as fast as a local installation, using a VM is the convenient way to run Windows and its software on a Mac.. Fortunately the process is pretty easy, if you know how. Advertisement is virtualization software for macOS It lets you run multiple operating systems like Windows 10, Linux, and macOS inside virtual installations on your Mac.

There's no need for a dedicated Microsoft offers a simple tool to create a bootable USB on Windows, but there is no such tool for Mac users.
